

SMART LOIRE VALLEY (SLV) Programme

Call for applications and guidelines: campaign 2020

Tuesday 5th November 2019 to Wednesday 5th February 2020 (17:00 – CET Paris time)

“After all, science is essentially international, and it is only through lack of the historical sense that national qualities have been attributed to it.”

Marie Skłodowska-Curie,

Double Nobel Prize winning Polish-French scientist famed for her work on radioactivity

PREAMBLE

Created in 1996, inspired by the Loire Valley historical, geographical and human cultures, the objective of LE STUDIUM Loire Valley Institute for Advanced Studies is **to create a dynamic *outwards-looking* international scientific community** in the Centre-Val de Loire (France) region covering all research disciplines and involving public and private research institutions.

LE STUDIUM designs programmes **to attract and welcome experienced international researchers** to the laboratories and enterprises of the Centre-Val de Loire region. To date, LE STUDIUM has attracted more than 204 experienced researchers to the region coming from 47 countries.

LE STUDIUM leads the **scientific exchange, network activities and animation** of LE STUDIUM international faculty of fellows, in order **to favour cross-disciplinary exchanges** with regional and international scientific communities to **build human capacity for research, development and innovation**.

LE STUDIUM Loire Valley Institute for Advanced Studies, operates with a network of partners including the University of Orleans, University of Tours, INSA Centre Val de Loire, ESAD Orléans, and national research institutions: CNRS Centre Limousin Poitou-Charente, BRGM, CEA Le Ripault, Inserm, Centre INRA Val-de-Loire and IRSTEA (soon merging as INRAe); and Clusters of competitiveness. In total, more than eighty laboratories of its different member structures work with LE STUDIUM.

CONTACTS

For scientific and technical questions:

- Dr Aurélien Montagu - Scientific Relations Manager
aurelien.montagu@lestudium-ias.fr
+33 238 211 486

For administrative and financial questions:

- Sophie Gabillet - General Secretary
sophie.gabillet@lestudium-ias.fr
+33 238 211 481

For technical questions related to the online submission platform:

- Djamila Rachidi – Web & Communication Manager
djamila.rachidi@lestudium-ias.fr
+33 238 211 483

1 - CONTEXT AND OBJECTIVES OF THE CALL FOR APPLICATIONS & PRESENTATION OF THE PROGRAMME

1 - 1 Context and objectives

For the campaign 2020, the Smart Loire Valley (SLV) Programme offers three different partnering awards (professorships, visiting researchers and consortia) with mutual obligations between the awardee, the host laboratory and LE STUDIUM. Beyond supporting the international mobility of researchers, the programme aims to strengthen the international visibility of laboratories and enterprises in the Centre-Val de Loire region and to create sustainable links between researchers, regional laboratories, enterprises and their counterparts all over the world.

This programme targets experienced international researchers who have to embody, in their profile, the key words that capture the research values of LE STUDIUM: Curiosity, Imagination and Intuition. These values help to create a dynamic outwards-looking international scientific community that recognises the benefits of international, multi- or interdisciplinary and intersectoral research approaches. The awards' package creates conditions that catalyse the development of scientific and human interactions between LE STUDIUM members' research structures and enterprises in the Centre-Val de Loire region in order to strengthen research and development in the wider Loire Valley community. This is in parallel to funding the salary and/or accommodation of senior international researchers in residence.

LE STUDIUM develops an ambitious programme with innovative awards formats programme which benefits the researchers, regional host laboratories and the development and innovation ecosystem in region Centre-Val de Loire.

1 - 2 Brief presentation of the programme

This call for applications does not target any specific research themes. **It is open to experienced international researchers in all disciplines** (except research directly linked to military applications) wishing to join a research laboratory in Centre-Val de Loire region (including universities, public research institutions and enterprises). A host laboratory in the Centre-Val de Loire region must have been identified¹.

The Smart Loire Valley Programme's call for applications offers 3 categories:

LE STUDIUM RESEARCH PROFESSORSHIP enables an experienced international Professor to participate in research, research team building and postgraduate teaching. The Professorship residence is a period of three months in Centre-Val de Loire region for 4 consecutive years (12 months in total).

LE STUDIUM VISTING RESEARCHER award targets experienced international researchers having or keeping a salary in their home institution and willing to join a laboratory in Centre-Val de Loire region for a scientific residency for a period of 3 to 12 months. This programme supports the welcoming and residence in the region and the integration into the LE STUDIUM scientific community.

LE STUDIUM RESEARCH CONSORTIUM award supports the formation of a team of five experienced researchers (one researcher from Centre-Val de Loire region and four international researchers) and their interactions. The Consortium team meets for a full week twice a year over 2 years (4 meetings in total). The consortium should have a well-defined objective, a research work plan to implement in order to achieve outcomes through milestone goals linked to the meetings.

¹ In order to identify a host laboratory in Centre-Val de Loire region, experienced international researchers interested in LE STUDIUM opportunities are invited to contact LE STUDIUM (see page 1).

| Programme | Duration | Candidate | Offer | Competitivity level |
|---------------------|---|--|---|---------------------|
| Professorship | 4 periods of 3 months (12 months in total) over 4 consecutive years | International Professor | -Salary -Accommodation -Administrative support -International scientific events -Integration into the Le Studium scientific community | **** |
| Visiting Researcher | 3 to 12 consecutive months | Experienced international researcher | -Accommodation -Administrative support -International scientific events -Integration into the Le Studium scientific community | ** |
| Consortium | One-week meeting every 6 months over 2 years (4 meetings) | Researcher based in the Centre-Val de Loire region | -Administrative support -Travel of the partners -Meals & accommodation for the participants | *** |

Nota bene: For Professorship and Visiting Researcher awards travel costs are not covered by LE STUDIUM. For all awards research costs have to be covered by the host laboratory.

2 - CHARACTERISTICS OF APPLICATIONS

The applicants are advised to answer all questions of the application form, in a manner that substantiates any claims made by the applicant. Particular attention, but not exclusively, is advised to the following dimensions: proposal background, research plan, data analysis and risk management, significance and innovation of the project, track record of the applicant researcher and of the host scientist.

The applications have to be written in English in order to allow evaluations by international experts. A French resume is required.

See Evaluation criteria in Section 5-3.

One of the objectives of the SLV Programme is the development of an enduring scientific relationship between the research fellow and the host laboratory.

Importantly, in order to support the application, the host scientist has to describe in the application form how the applying experienced researcher is essential to the envisaged research project. The host laboratory has to write a support letter arguing the importance of the application in line with its strategy. This topic may be mentioned in the support letter provided by the host scientist.

3 - THE SMART LOIRE VALLEY GENERAL PROGRAMME

3 - 1 LE STUDIUM RESEARCH PROFESSORSHIP

LE STUDIUM RESEARCH PROFESSORSHIP is intended to attract an outstanding international researcher for a cumulative 12-month period with residence in Centre-Val de Loire region for three consecutive months each year and for four consecutive years. Experienced international researchers are eligible to submit an application after having negotiated their acceptance to a host laboratory and/or host enterprise Centre-Val de Loire region. This award is open from

September 2020 to June 2021 for the starting date of the first period of residence.

After 4 years the Professorship output should consist of visible outcomes for the Professor, the host laboratory research teams and associated stakeholders. The outcomes should be related to research and possibly teaching activities at a high level. Achievements at the end of the Professorship should result in significant internationalisation of research through measurable and sustainable evolution of the research activity of the host laboratory.

OBJECTIVES

- 12-month residency (3 consecutive months each year for 4 consecutive years) to lead a collaborative project.
- introduction of a new research activity complementary to those of the research teams of the host laboratory,
- possible contribution to consolidating an emerging domain of research
- PhD students mentoring and teaching,
- organisation of a set of scientific events (talks, seminar, one workshop or summer school) with a unifying goal.

3 - 2 LE STUDIUM VISITING RESEARCHER

LE STUDIUM VISITING RESEARCHER award is an opportunity for senior scientists on leave from their institution with salary maintenance to integrate into a high-level laboratory in Centre-Val de Loire region and the LE STUDIUM international faculty for 3 to 12 months. Experienced international researchers are eligible to submit an application after having negotiated their acceptance to a host laboratory and/or host enterprise in Centre-Val de Loire. This award is open from September 2020 to June 2021 for the starting date of the fellowship.

This programme supports the installation of the visiting researcher and his/her family in the region (accommodation, logistics, administrative support). This programme is also very suitable for researchers holding an Individual Fellowship (like Full Bright, Marie Skłodowska-Curie Individual Fellowship, etc) willing to perform the fellowship in the region.

OBJECTIVES

- 3 to 12 consecutive months residency to lead a collaborative research project,
- integration into the international research faculty in region Centre-Val de Loire,
- involvement in the scientific exchange, network activities and animation led by LE STUDIUM to favour transdisciplinary exchanges,
- invitation to scientific events (conference/workshop, seminar....) organized by LE STUDIUM
- creation of a long-lasting link between the international researcher and the host laboratory.

4 - LE STUDIUM RESEARCH CONSORTIUM

LE STUDIUM RESEARCH CONSORTIUM is a format that includes one researcher or research team from Centre-Val de Loire and four experienced international researchers. A consortium proposal can be submitted by a research scientist, an SME enterprise or a former LE STUDIUM RESEARCH FELLOW with active collaboration with a Centre-Val de Loire host laboratory.

LE STUDIUM provides the financial and logistic support to allow this team of 5 researchers to meet for one full week, twice a year, for 2 consecutive years, in Centre-Val de Loire. Additional partners are permitted if they are supported by other financial sources, which should be mentioned in the application (in the section dedicated to the collaborators of the project). In order to facilitate the scientific activities and relations of the consortium with LE STUDIUM, its Scientific Relations Manager or an appointed delegate participates in the opening and concluding sessions of each one-week meeting.

LE STUDIUM RESEARCH CONSORTIUM programme offers the opportunity to create a team of up to five internationally competitive senior researchers, public or private, sharing a common and clearly identified research objective. The consortium must provide a programme and workplan prior each meeting, a report after each meeting explaining the outcomes, to date, and outline the plan the next meeting and expected results of the project in the context of the original proposal. The four meetings have to take place within the time limit of 2 years starting from the first meeting date.

This award is open from September 2020 to June 2021 for the starting date of the first meeting.

OBJECTIVES

- Formation of a team of up to five internationally competitive senior researchers, public or private, sharing a clearly identified research objective,
- Opportunity to achieve a common goal such as, but not exclusively, address or workshop a multidisciplinary problem, organise an international workshop/conference, build a H2020 application, write a book chapter, build a market strategy, etc...
- Better understanding of the expertise of each partner and his/her research team in order to build future collaborative research projects.

5 - REVIEW OF THE APPLICATIONS

5 - 1 Eligibility criteria

This programme is intended to attract senior international researchers that are in possession of a doctoral degree and have at least five years of full-time equivalent research experience after their doctorate.

For Professorship and Visiting Researcher programmes, to be eligible, applicant researchers must be national or long-term resident of a country other than France. Long-term residents are researchers who spent a period of full-time research activity of at least 5 consecutive (without breaks in research) years in a country other than France.

In addition, applicant researchers must also comply with the following mobility rule: applicants must not have resided or carried out their main activity (work, etc.) in France for more than 12 months in the 3 years immediately prior to the deadline for submission of proposals. Compulsory national service and/or short stays such as holidays are not taken into account.

5 - 2 Ethics

All research activities should respect fundamental ethics principles, including those reflected in the Charter of Fundamental Rights of the European Union. These principles include the need to ensure the freedom of research and the need to protect the physical and moral integrity of individuals and the welfare of animals.

It is strongly recommended that all applicants refer to the following document:

http://ec.europa.eu/research/participants/data/ref/h2020/grants_manual/hi/ethics/h2020_hi_ethics-self-assess_en.pdf

5 - 2 - 1 Ethics procedure

Research organisations that house the host laboratories (Universities, CNRS, INRA, INSERM, INRAe, etc...) have ethics

committee protocols with rules and codes of practice that are adhered to when reviewing studies involving ethics issues. Ethics committees include a cross disciplinary membership of scientists including anthropologists, philosophers ensuring the committee membership is able to consider research proposals in the appropriate context of the applicable ethics regulation. In addition, the expertise of the ethics committee members is consistent with the thematic of research under consideration.

The contractual agreements with Centre-Val de Loire research organisations hosting LE STUDIUM fellows state that *“professional activity is under the responsibility of the host laboratory/host scientist”*. Consequently, LE STUDIUM requires that laboratories obtain and provide documentary evidence, of all necessary ethics approval for research projects.

Thus, if an application involves research on humans or animals, LE STUDIUM requires that the host laboratory provides a letter from the appropriate institutional ethics committee stating that ethics approval has been granted for the proposed research project before the expiry of the fellowship probationary period (one month) or before starting an experiment not explicitly proposed in the application.

A copy of the ethics application and ethics approval is then sent to LE STUDIUM and filed with the research fellows' personal documents.

For its own activities, LE STUDIUM Loire Valley IAS operates under its own Code of conduct and Ethics to which all employees and research fellows must abide

5 - 2 - 3 Human research

For proposals involving human subjects, the host scientist/host laboratory submits the research proposal to the Clinical Studies Ethics Committee, which approves clinical studies. This committee reviews the ethical issues in the research proposals.

LE STUDIUM applies the national French privacy regulations of “Centre National Informatique et Libertés” (www.CNIL.fr) regarding all personal data collections, utilisation and secure storage for research on humans.

5 - 2 - 4 Animal research

For proposals involving research on animals, the host scientist/host laboratory submits the research proposal to the region Centre-Val de Loire Animal Ethics Committee, which approves animal studies. This committee reviews the ethical issues in the research proposals.

5 - 2 - 5 Monitoring ethical issues for the individual research projects

For studies involving human subjects and animals, the researcher must report any adverse events according to the host laboratory standard operating procedures and to LE STUDIUM. Any adverse events and action taken must be reported to LE STUDIUM as soon as possible. If necessary, the researcher must provide LE STUDIUM with the amended ethics approval document if adverse events require approved remedial action for the study to continue.

5 - 2 - 6 Data privacy

LE STUDIUM pays particular attention to the use of personal data collection and always requires a written authorisation before publishing information about a fellow or a research project. LE STUDIUM has endorsed the new RGPD rules for all its activities.

5 - 3 Evaluation criteria

External peer-reviewers and Scientific Committee members follow three categorical criteria to review applications: the

scientific quality, significance and/or innovation of the proposed research and the presented experience, including achievements and awards within a diversified career path, of the applicant and host scientist/partners:

- 1. Scientific Quality (50%)** – This includes the clarity of the stated research objectives, the strengths and weaknesses of the proposed research project, feasibility, risk management and compliance with the ethical principles of H2020.
- 2. Significance and/or Innovation (25%)** – This includes the demonstrated skill and ability of the researcher and his/her proposal to increase knowledge, the application of new ideas, procedures, technologies, programmes or policy settings to important topics that will impact the proposed field of study and contribute to the regional Research and Technological Development (RTD) and European Research Area (ERA) strategies.
- 3. Track Record (25%)** – The track record evaluates whether the applicant's previous research activities demonstrate her/his capacity to achieve the proposed scientific objectives. This includes the applicant's ability to contribute to the research especially in terms of having the appropriate mix of research skills and experience, to work with research teams and enterprise partners. Experience of inter-sectorial and/or transnational mobility, as well as experience of working in multidisciplinary teams, management experience and team building experience, experience of transfer of technology and training will also be considered. An interruption to the applicants' career path should be documented. Interruptions may include pregnancy and child care, escaping regions of conflict, unexpected illness etc.

Private sector researchers are also eligible to submit proposals. For enterprise applications, other than academic achievement in research (number of publications, impact factor of the publications, etc.), the evaluation criteria may include:

- Industrial experience of the candidate;
- Candidate's capacity for innovation;
- Scientific quality of the research proposal;
- Potential market impact of the proposal;
- Opportunity for the enterprise to achieve a technological advantage;
- Potential financial contribution of the enterprise.

5 - 4 Evaluation process

After the campaign closing date, LE STUDIUM team performs an administrative check to ensure each application conforms to the submission format guidelines and that all necessary documents are complete and signed. Only eligible applications will be considered for review and selection.

To ensure a fair transparent evaluation and selection procedure, the following occurs:

- **LE STUDIUM** ensures that the global administration and management of the evaluation process is respecting set criteria for the scientific review, including non-discrimination and conflict of interest rules.
- **External peer-reviewers** are invited to provide an independent, expert assessment of the scientific content of each eligible application based on the selection criteria. A minimum of three reviewers, screened for conflict of interest, are invited to evaluate each submitted application.
- **Scientific Committee** is composed of twenty-five eminent scientists from both public and private sectors, including researchers from the Americas and Europe. This committee, with the assistance of external peer-reviewers, provides an independent, impartial and fair scientific assessment of applications. After the Scientific Committee meeting, Interviews will be organized with pre-selected candidates. Observers, without any voting rights, from LE STUDIUM member structures are invited to attend the meeting of the Scientific Committee in June each year.
- **Notification of results:** the cumulative scores and comments of external peer-reviewers, Scientific Committee members and Interview Panel allow LE STUDIUM team to build the Evaluation Summary Report (ESR) for each application and to establish the final ranking list. Notification letters and ESR are sent to candidates by end of June 2020.

5 - 5 Appeal - Redress procedure

- Should an applicant feel that there has been a shortcoming in the process for the evaluation of her/his proposal, s/he may call upon this procedure. The appeal can be done after each step of the evaluation process.
- A candidate willing to appeal is invited to send an email to the General Secretary of LE STUDIUM. The message should mention: the title of the application, the elements in the evaluation procedure perceived as unfair or inappropriate by the applicant and the correction measures that the candidate deems necessary.
- The General Secretary will share these elements with LE STUDIUM President (and Chairman of the Scientific Committee) who will review them with the concerned stakeholders involved in the evaluation process and corrective actions will be undertaken if necessary.
- Within 10 days after the redress request message, the candidate receives a feedback informing about the decision of LE STUDIUM President about her/his redress.

6 - NOTIFICATION - DISSEMINATION OF RESULTS

The Scientific Committee meeting will take place in early June 2020 and interviews will be scheduled in the next two weeks.

Final results will be communicated within 4 weeks after the meeting of the Scientific Committee: a letter from the Chairperson of the Scientific Committee will notify all applicants.

After notification, the awarded applicants will have two weeks to confirm their acceptance of the award.

If an applicant does not accept the award the award is given to the following candidate placed in the final ranking list, on a reserve list.

All applicants awarded or not awarded will receive an official notification and an evaluation summary report (ESR) listing the strengths and weaknesses of their proposal. For non-award applicants, the evaluation summary report may be helpful to improve the application and apply again for the next campaign.

7 - GENERAL PROVISION AFTER ACCEPTANCE OF PROFESSORSHIPS AND VISITING RESEARCHERS AWARDS

7 - 1 Preparation for the fellows' arrival

After an award to an applicant has been accepted, the host scientist is invited for a meeting with LE STUDIUM to discuss the fellow's arrival and more particularly to precisely define the time window for the arrival. In parallel, the awarded applicant is invited for a videoconference meeting with LE STUDIUM team to review the awards details and clear up administrative questions. Then a formal letter of offer is sent to the fellow summarizing the work contract conditions.

Following acceptance of the offer by the candidate, LE STUDIUM team takes in charge all the administrative tasks for the fellow's arrival (visa, residence permit, registration to the French social security scheme, private medical coverage, school for children, French class, other activities...). Likewise, accommodation is prepared to welcome the fellow and her/his family.

7 - 2 Welcoming the fellow

Upon her/his arrival, a member of LE STUDIUM team, welcomes the fellow and her/his family, introduces them to their apartment and answers any practical question. The next day the fellow attends a meeting with the administrative team of LE STUDIUM to review and finalise all contractual documents.

In the following days, the fellow and host scientist are invited to a scientific discussion with LE STUDIUM General Secretary and LE STUDIUM Scientific Relations Manager. A meeting with the Senior Scientific Advisor is also organised in the first month of their residency to review the career development plan.

7 - 3 Contractual obligations during residency

LE STUDIUM programme awards are partnership awards with mutual obligations between the researcher in residence,

the host laboratory and LE STUDIUM. The awarded researcher, the host scientist and his/her research team are invited to participate in the scientific life of LE STUDIUM international research faculty, in particular by attending the monthly LE STUDIUM THURSDAYS interdisciplinary meetings.

They will have the opportunity to organise a one or two-day LE STUDIUM CONFERENCE/WORKSHOP residency in the Centre-Val de Loire region, with the logistical and partial financial support of LE STUDIUM, during their residency. The host laboratory commits to concretely participate in the fundraising and funding of the conference. See eligibility conditions in section 9-1.

At the end of the project, LE STUDIUM researcher is asked to produce a final report explaining the outcomes of the project in the context of the original proposal. This report is due at the scheduled exit meeting with LE STUDIUM General Secretary and Scientific Relations Manager. The report will be made publicly available on LE STUDIUM website on a dedicated LE STUDIUM Journal section.

Host laboratories in region Centre-Val de Loire who accept LE STUDIUM professorships will sign a collaborative agreement “convention de mise à disposition” through which mutual rights and obligations are detailed. Hosting laboratories commit to respect EU procedures regarding ethics procedures, researchers’ rights and researchers’ involvement in research projects. LE STUDIUM does not acquire any intellectual property rights.

Other contractual obligations like open access publications, credits, or mention of LE STUDIUM affiliation in the communication will be mentioned in the work contract.

8 - GENERAL PROVISIONS AFTER ACCEPTANCE OF A LE STUDIUM RESEARCH CONSORTIUM AWARD

8 - 1 Preparation of the first meeting

After acceptance, the coordinator of the Consortium will be invited for a scientific meeting with the LE STUDIUM. The objectives are:

- To discuss the scientific mission of the consortium;
- To define the scientific programme of the first meeting and agree on timing.

8 - 2 Logistics for each meeting

LE STUDIUM team manages the logistics related to the meeting venue, meals, accommodation and travel arrangements for their visit in region Centre-Val de Loire (travel bookings, visas...).

The week-long meeting is fully funded by LE STUDIUM within a capped budget envelope. The venue and materials necessary for the best outcome for the Consortium’s week of scientific activities are coordinated by LE STUDIUM.

The first meeting of the CONSORTIUM has to be hold between September 2020 and July 2021.

Following meetings have to be planned and organised to fit in the two-year timeframe of the award.

8 - 3 Contractual obligations during the Consortium period

After first and third Consortium meeting, the coordinating scientist must provide a brief report (3 pages maximum) to summarize the meeting.

After the second meeting, an interim report must be provided and at the end of the consortium the partners are asked to produce a final report explaining the outcomes of the project in the context of the original proposal. This report maybe made publicly available on LE STUDIUM website, printed publications and circulated to interested parties.

9 - SCIENTIFIC EVENTS: AN OPPORTUNITY FOR RESEARCH FELLOWS, REGIONAL RESEARCHERS AND LABORATORIES

All awards include scientific animation led by LE STUDIUM to provide interdisciplinary exchanges and establishment of new international collaborations.

This scientific animation declines in different formats described hereafter. LE STUDIUM fellows, their host scientists and the members of the host laboratories present in the region Centre-Val de Loire universities and research structures, public and private, are invited to attend these events. They are also designed to attract national and international participants.

9 - 1 LE STUDIUM CONFERENCE

Professorship awardees have the opportunity to convene one international conference called **LE STUDIUM CONFERENCE/WORKSHOP**. These one or two-day international events are co-organised by the resident researchers, and their host laboratories with the logistical and partial financial support of LE STUDIUM.

To be eligible to the funding of these international LE STUDIUM Conferences, fellows will be asked to prove the singularity and the interdisciplinarity of the proposed event: originality design, complementary approaches, topics generally not covered in standard conferences, adopt a differentiated position of communication, list of potential guests of high level, dissemination of the conference outcomes. The conference has to pursue a specific mission with clear interdisciplinary scientific objectives. The conference project will be submitted to the members of the LE STUDIUM Scientific Committee members who will recommend or not the organisation of the event.

9 - 2 LE STUDIUM THURSDAYS

LE STUDIUM animates its international faculty of researchers through regular monthly interdisciplinary seminars called **LE STUDIUM THURSDAYS**. Each THURSDAY addresses a scientific topic of one or two LE STUDIUM fellows' research field. The challenge is that the speakers have to express themselves in such a way that the other fellows, whose specialties may be completely out of their own field of research, should understand them. These meetings encourage interdisciplinary exchanges, with the goal of germinating original scientific projects among researchers. They help the fellows to deepen their communication skills within their discipline and with other researchers and contribute to strengthen LE STUDIUM faculty of international research scholars. LE STUDIUM encourages its community of researchers to look to the "universal" scientific man, as spoken of during the Renaissance period, especially in the Loire Valley where attracting international "talents" prevailed and was typified by Leonardo de Vinci.

Regional political and/or scientific personalities are often invited to exchange with the LE STUDIUM RESEARCHERS to bring a better understanding of the attractiveness of the Centre-Val de Loire region.

THURSDAYS are open to attendance of doctoral students.

10 - Application **FORMAT** and **ONLINE SUBMISSION**

10 - 1 Process

Proposals must be submitted online through the LESTUDIUM website by Wednesday 5th February 2020 (17:00 – CET Paris time)

- Go to www.lestudium-ias.fr

From the top menu, select **APPLY**.

- Select the recruitment type: Click on International Interdisciplinary Intersectoral Smart Loire Valley Programme.

Apply

LE STUDIUM Loire Valley Institute for Advanced Studies (IAS) welcomes experienced international researchers of all scientific disciplines through the SMART LOIRE VALLEY Programme.

A call for applications for high added-value research projects for the Centre-Val de Loire region is open from November each year to February next year. Awarded applicants are selected by external independent peer reviewers and LE STUDIUM iScientific Council.

LE STUDIUM IAS is as well a key partner of the smart specialisation ARD2020 programmes funded by the Région Centre-Val de Loire and offers goal oriented Fellowships.

10 - 3 Advices for the submission

It is strongly recommended to:

- Register on LE STUDIUM website soon after the opening of the call for applications;
- Refer to the FAQ document posted on LE STUDIUM website;
- Not wait until the deadline for submission of your application;
- Contact, if necessary, by e-mail one of the correspondents listed on page 2 of this document.
