

LE STUDIUM

CONFERENCES

Dr. Juanita Mora-Gomez

School of Biological Sciences, Bangor University – UK

Dr. Juanita Mora currently works at the School of Biological Sciences, Bangor University. Juanita does research in Ecology, Limnology and Microbiology. Their current project is 'Microbial communities of Temperate, Arctic and Tropical peatlands and their role in the response of carbon storage function to global change (MicroPEAT)'. Her interests include quantification of greenhouse gas emissions.

Currently, she is a LE STUDIUM RESEARCH FELLOW working at ISTO (Institut des Sciences de la Terre d'Orléans) / CNRS, BRGM, University of Orléans in France.
