LE STUDIUM
Loire Valley
Institute for Advanced Studies

RÉGION CENTRE VAL DE LOIRE

Le Studium COLLABORATIVE RESEARCH & TRAINING Programme

LE STUDIUM TRAINING SCHOOL Award

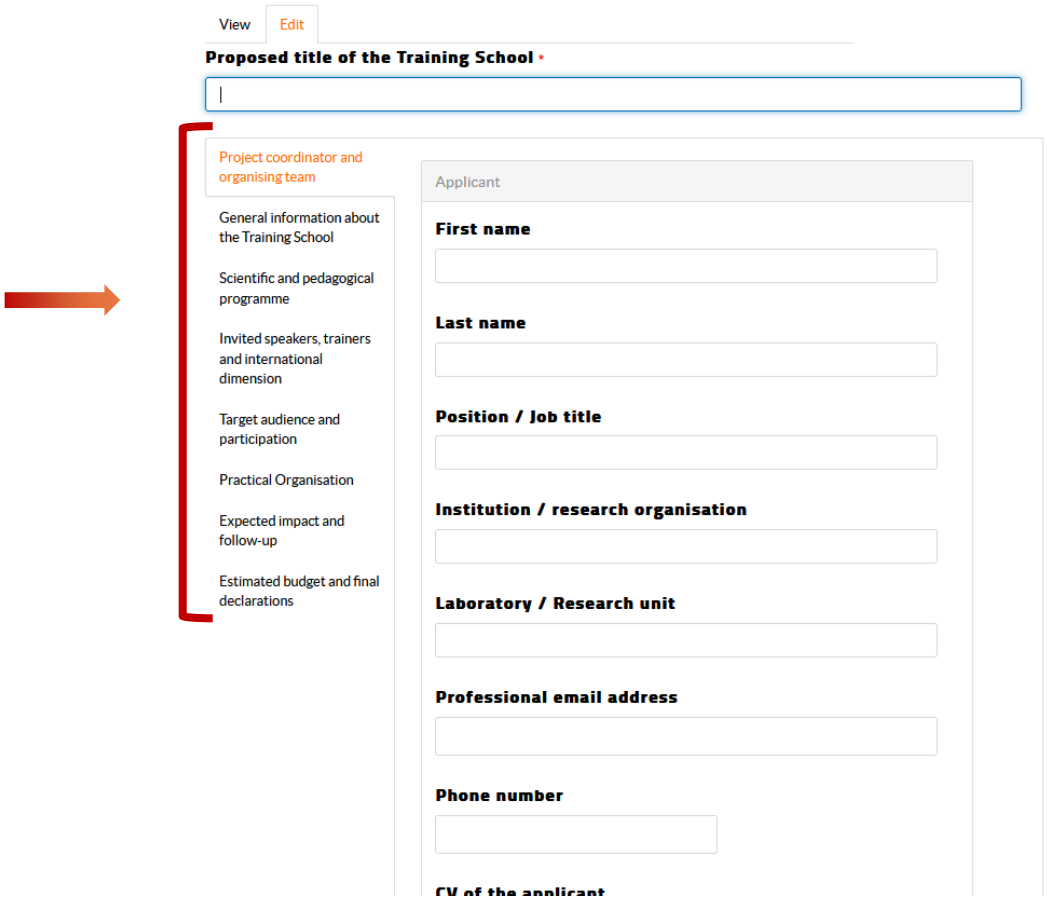

Call for Applications 2027

Indicative application format

Introduction:

Please note that this document is designed to share information between the applicant and her/his partners. **Applications must be completed online on the LE STUDIUM website.** An application submitted by email will **NOT** be valid.

To submit an online application, the applicant needs to register on the LE STUDIUM website. After validation of her/his account, the applicant will receive an email with an invitation to access the submission platform. Once he is logged into his personal space, the project to be completed can be found under the "projects" tab.

The form is divided into different sections, which you can access via the tabs on the left.
Click on each section to display and complete it.

1- Project coordinator and organising team

Give the following details concerning the applicant: first name, last name, position / job title, institution / research organization, laboratory / research unit, professional email address and phone number.

Upload the CV of the applicant (maximum 10 pages).

Additional organisers and partner institutions
-> Create a new “organizer /partner ” for each partner of the training school with the following details: first name and last name, institution / research organization, country, and email address.
-> Describe the partner role in the organization.

Content limited to 2000 characters for the role of the collaborator.

Indicate if a current or former LE STUDIUM Fellow is involved in the proposed training school?
If yes, please indicate the Fellow's name and expected contribution to the training school.
-> The participation of a Fellow is not a condition of eligibility.
Content limited to 500 characters.

2- General information about the training school

Give the following details concerning the training school: proposed title of the training school, acronym (if applicable), main scientific field(s) and keywords (3 to 5).

Write a summary of the proposal in English and in French (mandatory) with a concise overview of the scientific topic, training objectives, target audience, proposed format and expected outcomes.
Content limited to 1500 characters for each summary.

3- Scientific and pedagogical programme

Scientific scope and rationale of the Training School
Describe the scientific background, relevance and originality of the proposed Training School. Explain the need for this training initiative and how it addresses current developments, emerging methodologies or knowledge gaps in the field.
Content limited to 2 500 characters

Pedagogical objectives and expected learning outcomes
Clearly identify the knowledge, methodologies, techniques or skills that participants are expected to acquire. Explain the added value of the proposed training for their scientific development.
Content limited to 2 000 characters

Proposed training content and indicative programme
Present the proposed structure of the Training School, including its main sessions, scientific topics, indicative timetable and training activities. Explain how the different sessions contribute to the overall pedagogical objectives.
Content limited to 4 000 characters

Pedagogical approach and training formats

Describe the proposed balance between lectures, practical sessions, workshops, demonstrations, discussions or other interactive activities. Explain why the selected formats are appropriate for the targeted audience and intended learning outcomes.

Content limited to 1 500 characters

Interdisciplinary dimension (where relevant)

Where applicable, explain how the Training School brings together different disciplines, approaches or scientific perspectives and how these interactions will benefit participants.

Content limited to 1 200 characters

4- Invited speakers, trainers and international dimension

Proposed invited speakers and trainers

Identify the main speakers and trainers expected to contribute to the training school. For each person, provide their institutional affiliation, country, area of expertise and anticipated contribution. Please indicate whether their participation has already been confirmed or remains provisional.

International dimension of the Training School

Explain how the proposed Training School will bring together international expertise and attract participants from different countries and research environments. Highlight the diversity and relevance of the contributors and any existing or planned international partnerships.

Content limited to 1800 characters.

5- Target audience and participation

Describe the intended participants, including their career stage, scientific background and expected level of knowledge. Indicate whether the Training School primarily targets doctoral candidates, postdoctoral researchers or other early-career researchers, and specify any prerequisites for participation.

Content limited to 1500 characters.

Expected international participation

Indicate the expected geographical diversity of participants, including the main countries or regions targeted and, where possible, the approximate number of participants based outside France.

Content limited to 1000 characters.

Participant recruitment and selection strategy

Explain how the Training School will be advertised, how potential participants will be reached and, where applicable, how participants will be selected. Describe any measures intended to encourage international participation and ensure accessibility.

Content limited to 1200 characters.

6 - Practical organisation

Indicate the proposed dates of the training school (if already known), the expected duration (number of days) and the proposed format : fully in person or hybrid (in-person activities combined with online participation or sessions)

7 - Expected impact and follow-up

Expected benefits for participants and assessment of learning outcomes
Describe the expected scientific and professional benefits for participants. Explain how the achievement of the pedagogical objectives and participants' feedback will be assessed.

Content limited to 1500 characters.

Expected impact on the Centre-Val de Loire research and innovation ecosystem

Explain how the Training School will contribute to the visibility, international attractiveness and scientific development of the Centre-Val de Loire region, particularly through its involvement of regional research teams and institutions.

Content limited to 1500 characters.

8 - Estimated budget and final declarations

Estimated expenditure
Provide a realistic estimate of the main expenses required to organise the Training School. All amounts should be expressed in euros (€).
The budget must be consistent with the proposed programme, number of participants and organisational format.

Estimated funding
Indicate the financial contributions expected to cover the estimated expenditure.
Choose between 4 types of "funding source", enter its name, the amount and specify whether contributions are confirmed, under discussion or still to be requested.

Indicate the contribution requested to Le Studium and the proposed registration price per participant.

Indicative programme of the Training School
You may upload a draft programme providing additional details on the proposed sessions, speakers, training activities and indicative schedule. (pdf, maximum 3 pages)

Additional information (if applicable)
Please provide any additional information that you consider relevant to the assessment of your application and that has not been covered in the previous sections.

Content limited to 1000 characters.

Deadline: the submission of all parts has to occur before the 2nd February 2027, 5pm CET.
